Example

Thomas Lim is a 35-year-old business consultant, non-smoker. His wife is a homemaker who cares for their two children and elderly parents.

Thomas takes up AIA Guaranteed Protect Plus with an insured sum of S\$50,000 and with a multiplier of 2X, it instantly increases his coverage to S\$100,000 up to age 65. He also adds on Critical Protector Life that enjoys the same 2X coverage up to age 65. He pays a monthly premium of S\$159.78 for the next 20 years.

At 55, even though he finishes paying his premium, he still gets to enjoy the same level of protection and grow his cash value.

At 65 when his children are financially independent, his coverage is reduced to S\$50,000 and the plan continues to cover him to age 100 while the cash value grows.

At 70, the TPD cover ends and Thomas continues to enjoy protection for life and CI to age 100 while the cash value accumulates.

The precise terms and conditions of these plans, including exclusions whereby the benefits under these plans may not be paid out, are specified in the policy contracts. You are advised to read the policy contracts.

Buying a life insurance policy can be a long-term commitment. An early termination of the policy usually involves high costs and the surrender value payable may be less than the total premiums paid. You should consider carefully before terminating the policy or switching to a new one as there may be disadvantages in doing so. The new policy may cost more or have fewer benefits at the same cost.
